

COPPER-GOLD AND ZINC-SILVER COMPANY MAKING PROJECTS IN SWEDEN

JULY 2023

ALICANTO
MINERALS LIMITED

Disclaimer

This presentation has been prepared by Alicanto Minerals Limited (“Alicanto” or the “Company”) and is authorised by the Board of Directors of Alicanto.

General Information & Disclaimer

This presentation has been prepared for the purposes of providing information to the recipient regarding Alicanto. It does not, and does not purport to, contain all the information that the recipient may require to evaluate the Company. It should be read in conjunction with Alicanto’s other periodic and continuous disclosure announcements, which are available at www.asx.com.au.

No representation or warranty is given as to, and the recipient must not rely on, any information, statement or opinion contained in this presentation, or its accuracy, reasonableness or completeness. Except for statutory liability which cannot be excluded, each of Alicanto, its affiliates, directors, employees, advisers and agents expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever for any loss or damage of any kind arising as a result of the use of, or reliance on, the information in this presentation.

This presentation does not take into account the investment objectives, financial situation or particular needs of any investor, potential investor or any other person. No investment decision should be made in reliance on this presentation. Independent financial and taxation advice should be sought before making any investment decision.

Forward Looking Statements

This presentation may contain certain forward-looking statements and projections regarding: estimated resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives.

Forward-looking statements are subject to a variety of known unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those reflected in the forward- looking statements, including, without limitation: inherent uncertainties and risks associated with mineral exploration; uncertainties related to the availability of future financing necessary to undertake activities on Alicanto’s properties; uncertainties related to the possible recalculation of, or reduction in Alicanto’s minerals resources; uncertainties related to the outcome of studies; uncertainties relating to fluctuations in metal prices; the risk that Alicanto’s title to its properties could be challenged; risks related to Alicanto’s ability to attract and retain qualified personnel, uncertainties related to general economic and global financial conditions; uncertainties related to the competitiveness of the industry; risk associated with Alicanto being subject to government regulation, including changes in regulation; risks associated with Alicanto being subject to environmental laws and regulations, including a change in regulation; risks associate with Alicanto’s need for governmental licenses, permits and approvals; uninsured risks and hazards; risk related to the integration of businesses and assets acquired by Alicanto; risk associated with Alicanto having no history if earnings or production revenue; risks associated with fluctuation in foreign exchange rates; risks related to default by joint venture parties (if any), contractors and agents, inherent risks associated with litigation; risk associated with potential conflicts of interest; risk related to effecting service or process on directors resident in foreign countries; uncertainties related to Alicanto’s limited operating history; risks related to Alicanto’s lack of a dividend history; risks relating to short term investments; and uncertainties related to fluctuations in Alicanto’s share price.

Alicanto’s forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date hereof and which Alicanto believes are reasonable in the circumstances, but no assurance can be given that these expectations will prove to be correct. These assumptions include, but are not limited to, that Alicanto’s exploration of its properties and other activities will be in accordance with Alicanto’s public statements and stated goals; that there will be no material adverse change affecting Alicanto or its properties; anticipated costs and timing for Alicanto’s activities and such other assumptions as set out herein.

Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved.

The Company does not make any representations and provides no warranties concerning the accuracy of the forward-looking statements, and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise except to the extent required by applicable laws.

Compliance Statements

The information in this presentation that relates to the Mineral Resource estimate for Sala is extracted from the Company’s announcement titled “Outstanding maiden Resource confirms Sala has global scale” which was released to the ASX on 13 July 2022. This presentation also contains references to Exploration Results, which have been cross-referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially effects the information in the original market announcements and, in the case of the Mineral Resource estimate, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

Overview

AGGRESSIVELY EXPLORING TWO HIGHLY PROSPECTIVE PROJECTS IN SWEDEN

Tier 1 Mining Jurisdiction
hosting world class mines

Team with a proven track record and
extensive in-country expertise (led
by ex-Chief Geologist of Boliden)

TWO 100% OWNED BROWNFIELD PROJECTS WITH SIGNIFICANT HISTORICAL PRODUCTION, HIGH PROSPECTIVITY AND LIMITED EXPLORATION

SALA

- Previously one of the largest and highest-grade silver mines in Europe
- Produced **200Moz of silver at an average grade of 1,244g/t and up to 7,000g/t¹**
- Currently Sweden's largest undeveloped zinc deposit
- **Maiden Inferred Resource of 9.7Mt @ 4.5% ZnEq²**

FALUN

- For centuries the Falun mine was the largest supplier of copper in the western world
- Closed in 1992 having produced **28Mt @ 4% Cu, 4g/t Au, 5% Zn, 2% Pb and 35g/t Ag³**
- Alicanto controls over 60km of the target limestone horizon
- Data supports concept of a major mineralized belt stretching over 10km

Projects

ALICANTO IS REDISCOVERING TWO OF SWEDEN'S GREAT MINES

SALA

Produced 200Mozs of Silver at an average grade of 1,244g/t¹

FALUN

Produced 28mt @ 4% copper, 4g/t gold and 5% zinc²

Corporate Summary

TRACK RECORD OF BROWNFIELDS DEVELOPMENT AND VALUE CREATION

Capital Structure

Shares on issue ¹	540.3m
Share price as at 14 July 2023	A\$0.04
Market Capitalisation	A\$21.6m
52 week low/high	A\$0.030 – A\$0.075
Cash on hand (as at 31 March 2023) ²	A\$4.6m

Shareholder Summary

Board & Management

Ray Shorrocks – Non-Executive Chairman

Co-founder of Bellevue Gold. Chair of Auteco. Extensive capital markets expertise

Rob Sennitt – Managing Director

Significant corporate and finance expertise. Ex Managing Director of MDL

Didier Murcia – Non-Executive Director

Chair of Strandline, Centaurus. Significant legal and corporate experience

Erik Lundstam – Chief Geologist

Former Chief Geologist of Boliden – seven major discoveries in Sweden (including Garpenberg and Sala)

Michael Naylor – Chief Financial Officer

NED of Bellevue, Auteco, and Cygnus. Experienced operator in Sweden

Steve Parsons – Corporate Consultant

Geologist with extensive experience. Co-founder and previous MD of Bellevue Gold

Why Sweden

HIGHLY PROSPECTIVE, TIER 1 MINING JURISDICTION

Developments in Europe

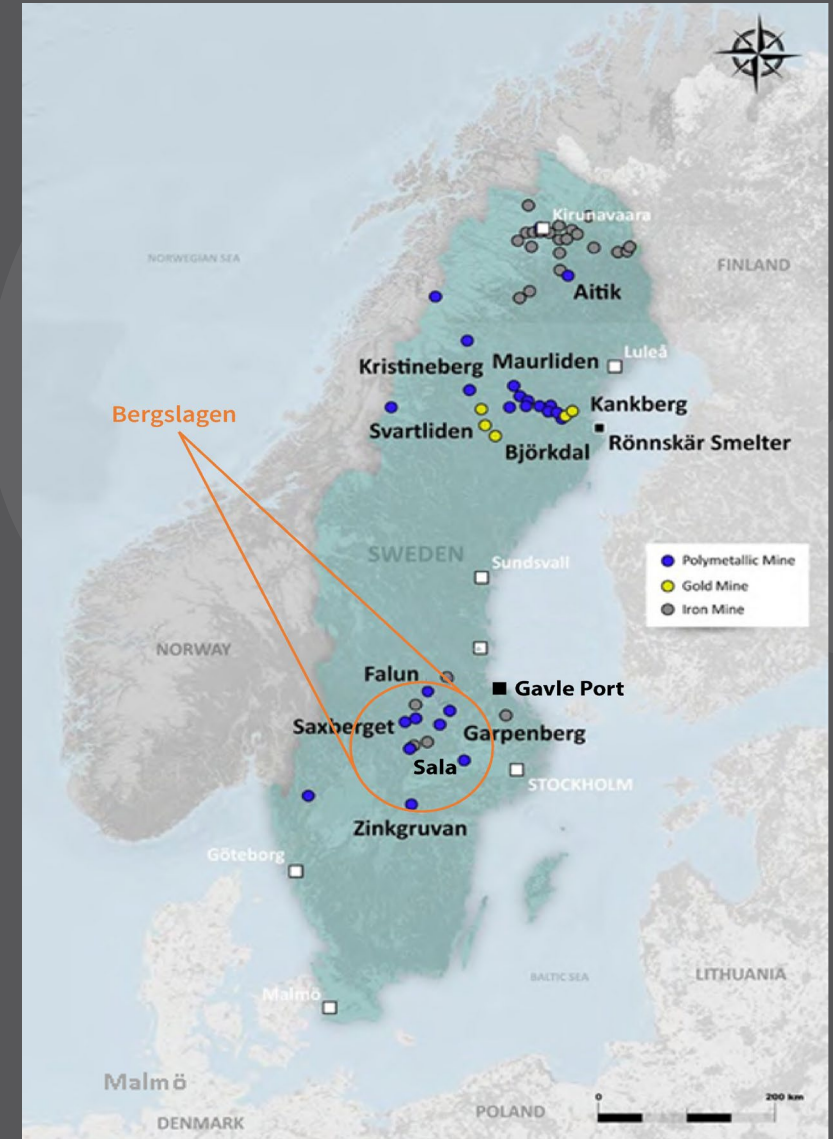

- EU seeking greater self-sufficiency in commodities (mandate for development of new sources of raw materials by Member States)
 - Utilise 25% of global mineral production but only produce 3-4%
 - Critical Raw Materials Act 2023 instituted during Swedish Presidency of EU

Sweden is one of Europe's major mining economies

- Top 20 mining jurisdiction globally¹
- Long mining history, dating back over 2,000 years
- Proximity to end markets
- Pragmatic approach by Government to mining as part of the Green Transition
- Development of new industries – Northvolt Battery, H2 Green Steel

Bergslagen is a world class mining district

- Strong mining culture
- Large mineralised systems
 - Home to some of the largest polymetallic deposits globally
- Relatively underexplored
- Extensive infrastructure

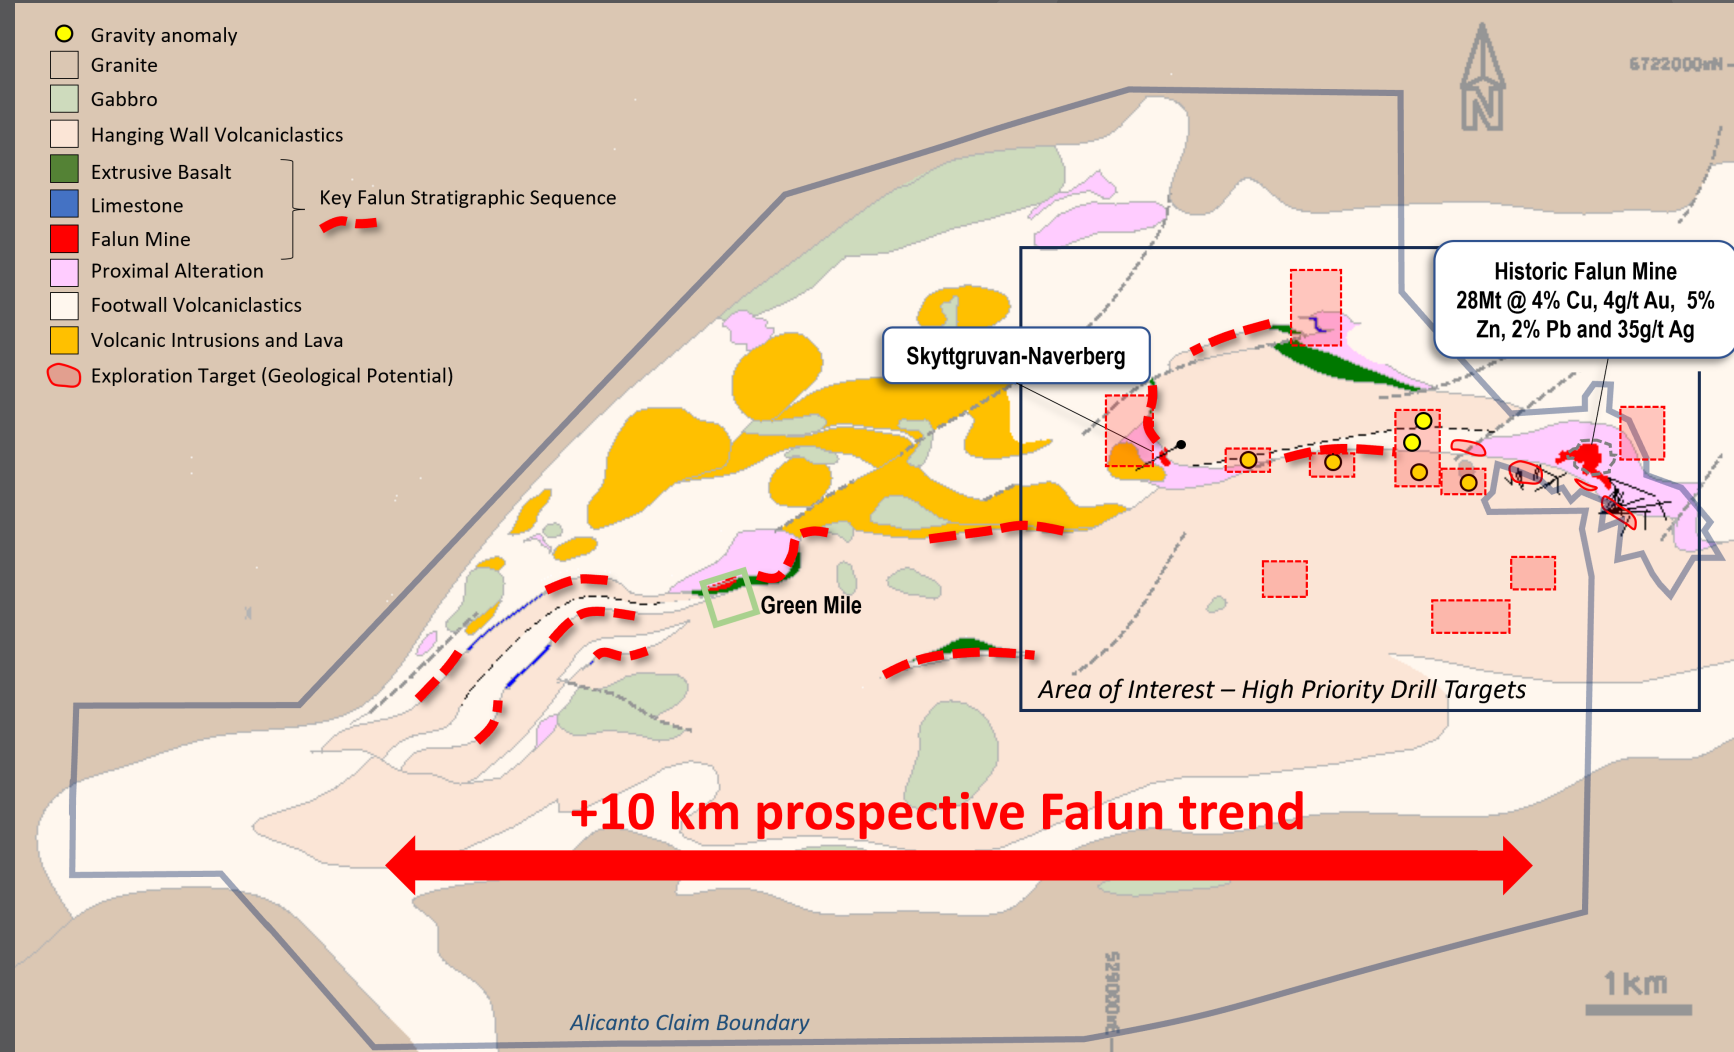

Falun Project

EVIDENCE POINTS TO MAJOR MINERALISED BELT STRETCHING OVER 10KM¹

Numerous high priority drill targets in 3.5km mineralised trend between Falun and Skyttgruvan

- Company has 100% ownership of over 60km of target limestone horizon within a total landholding of 312km²
- Mineral structure is stratabound limestone-skarn hosting Zn-Ag-Pb mineralisation
- Key target is another Falun style ore body (polymetallic sulphide deposit with pyrite rich core containing elevated Cu-Au-Zn-Ag-Pb grades)
- Alicanto is conducting the first modern systematic exploration of the prospective stratigraphy surrounding and to the west of the Falun mine
 - Excellent potential for future near mine discoveries

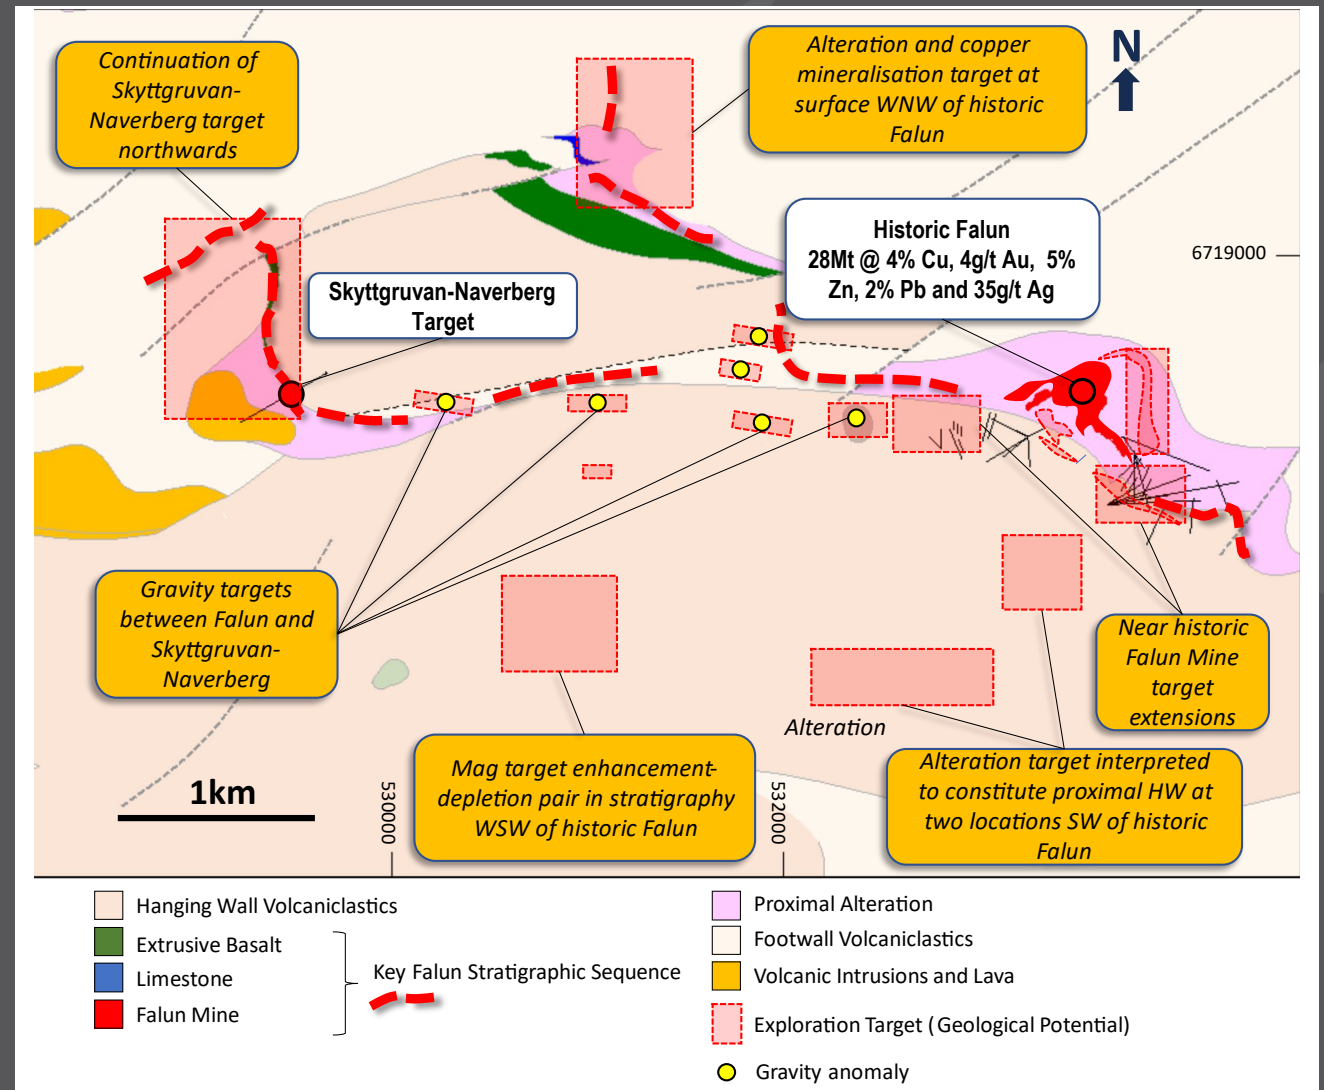

Unlocking the Potential of Falun

HIGH PRIORITY DRILL TARGETS IN THE PROSPECTIVE HOST HORIZON OF THE HISTORIC FALUN MINE¹

Exploration focused on high prospective 3.5km mineralised trend between Falun and Skyttgruvan

- Drilling at Skyttgruvan intersected Falun-style mineralisation² containing:
 - Native silver (assays up to 744g/t)
 - Copper (assays up to 1.9%)
 - Gold (assays up to 0.65g/t)
 - Zinc (assays up to 32.4%)
- Current modelling suggests Falun and Skyttgruvan are part of the same mineralised system
- Ground geophysics being used to refine high priority targets within the host stratigraphic sequence for diamond drill program

1. Refer AQI's ASX Announcement dated 10 July 2023; 2. Refer AQI's ASX Announcement dated 19 December 2022.

Unlocking the Potential of Falun

SIGNIFICANT NEW MINERALISED STRUCTURES IDENTIFIED ADJACENT TO HISTORIC FALUN MINE¹

Multiple high-priority brownfields targets identified with the potential to deliver rapid Resource growth around Falun

- No modern exploration undertaken at Falun since its closure in 1992
- Alicanto geologists continue to review and relog historic drill core
- Data has now been uploaded into a comprehensive 3D model for identifying high priority targets for the upcoming drill program
 - Excellent potential for future near mine discoveries
- The identified zones sit outside the historic mine and are not impacted by historical mining voids
 - Mineralisation remains open

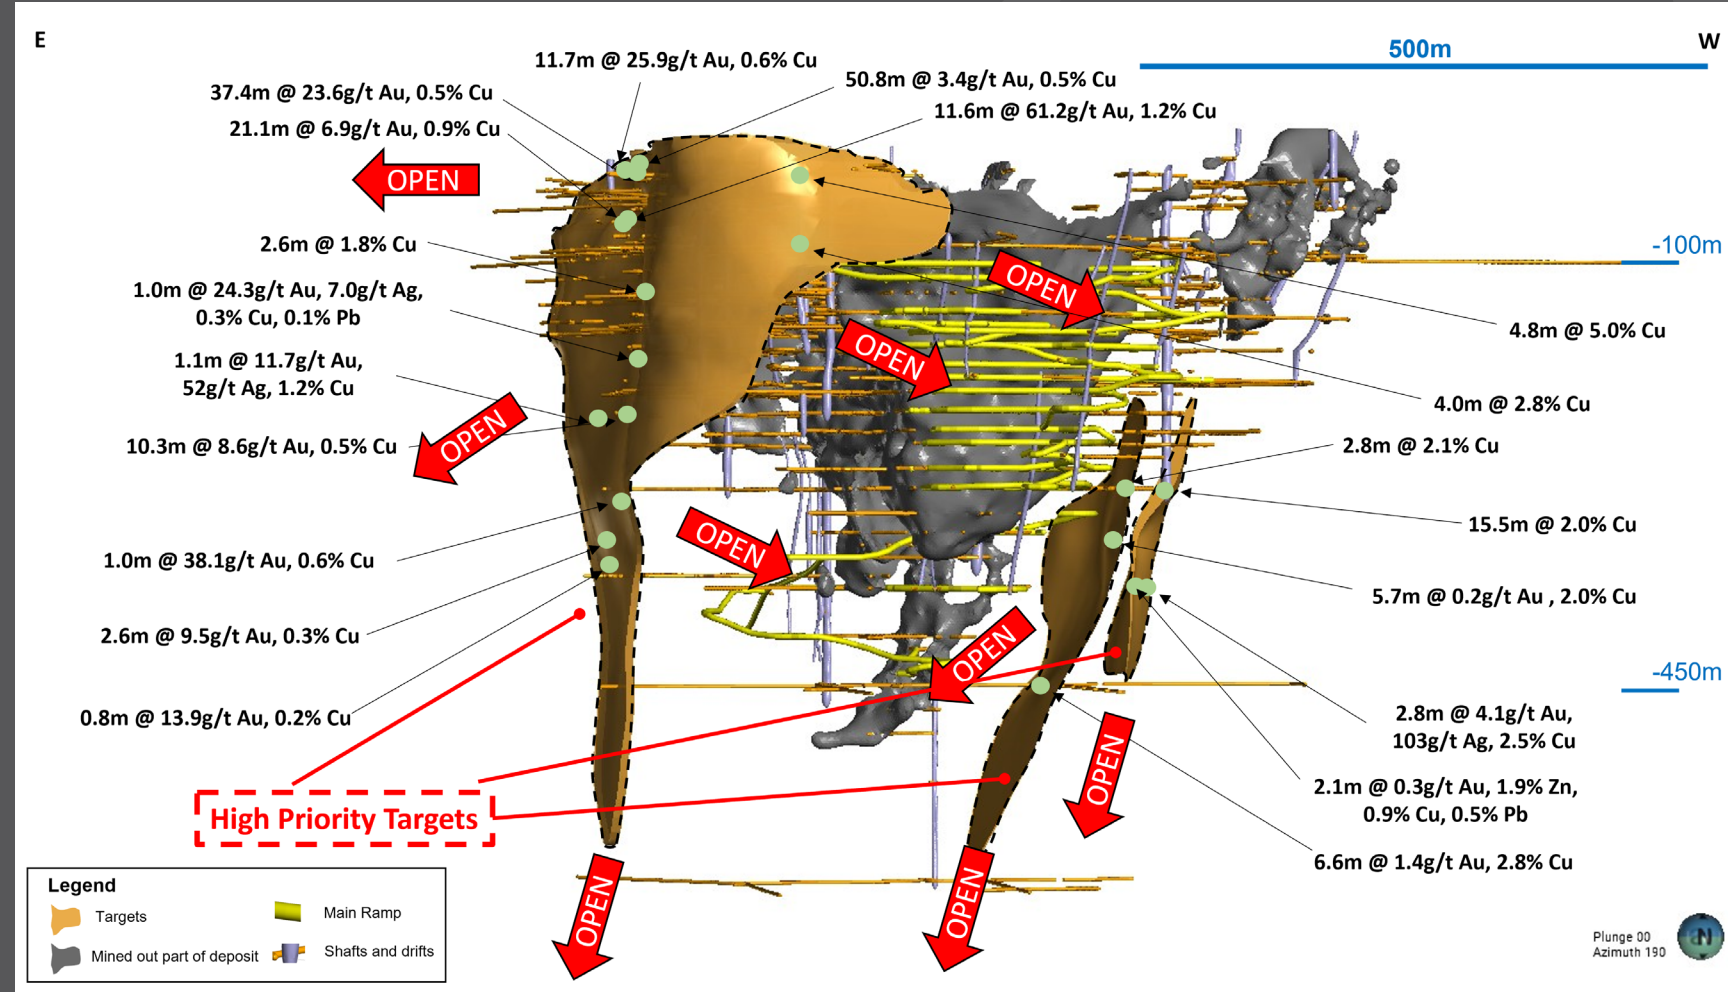

Unlocking the Potential of Falun

HIGH PRIORITY COPPER-GOLD TARGETS AT FALUN¹

Numerous high-grade copper-gold intersections identified

- Alicanto is seeking repeats of the Falun style mineralisation (polymetallic sulphide deposit with pyrite rich core containing elevated Cu-Au-Zn-Ag-Pb grades within host mineralisation)
- Numerous high-grade copper-gold intersections identified in historic drill core include:
 - 50.8m @ 3.4g/t gold, 0.5% copper
 - 37.4m @ 23.6g/t gold, 0.5% copper
 - 11.6m @ 61.2g/t gold, 1.2% copper
 - 7.2m @ 7.2% copper, 1.1g/t gold
 - 15.5m @ 2% copper
- All mineralised structures remain open in all directions

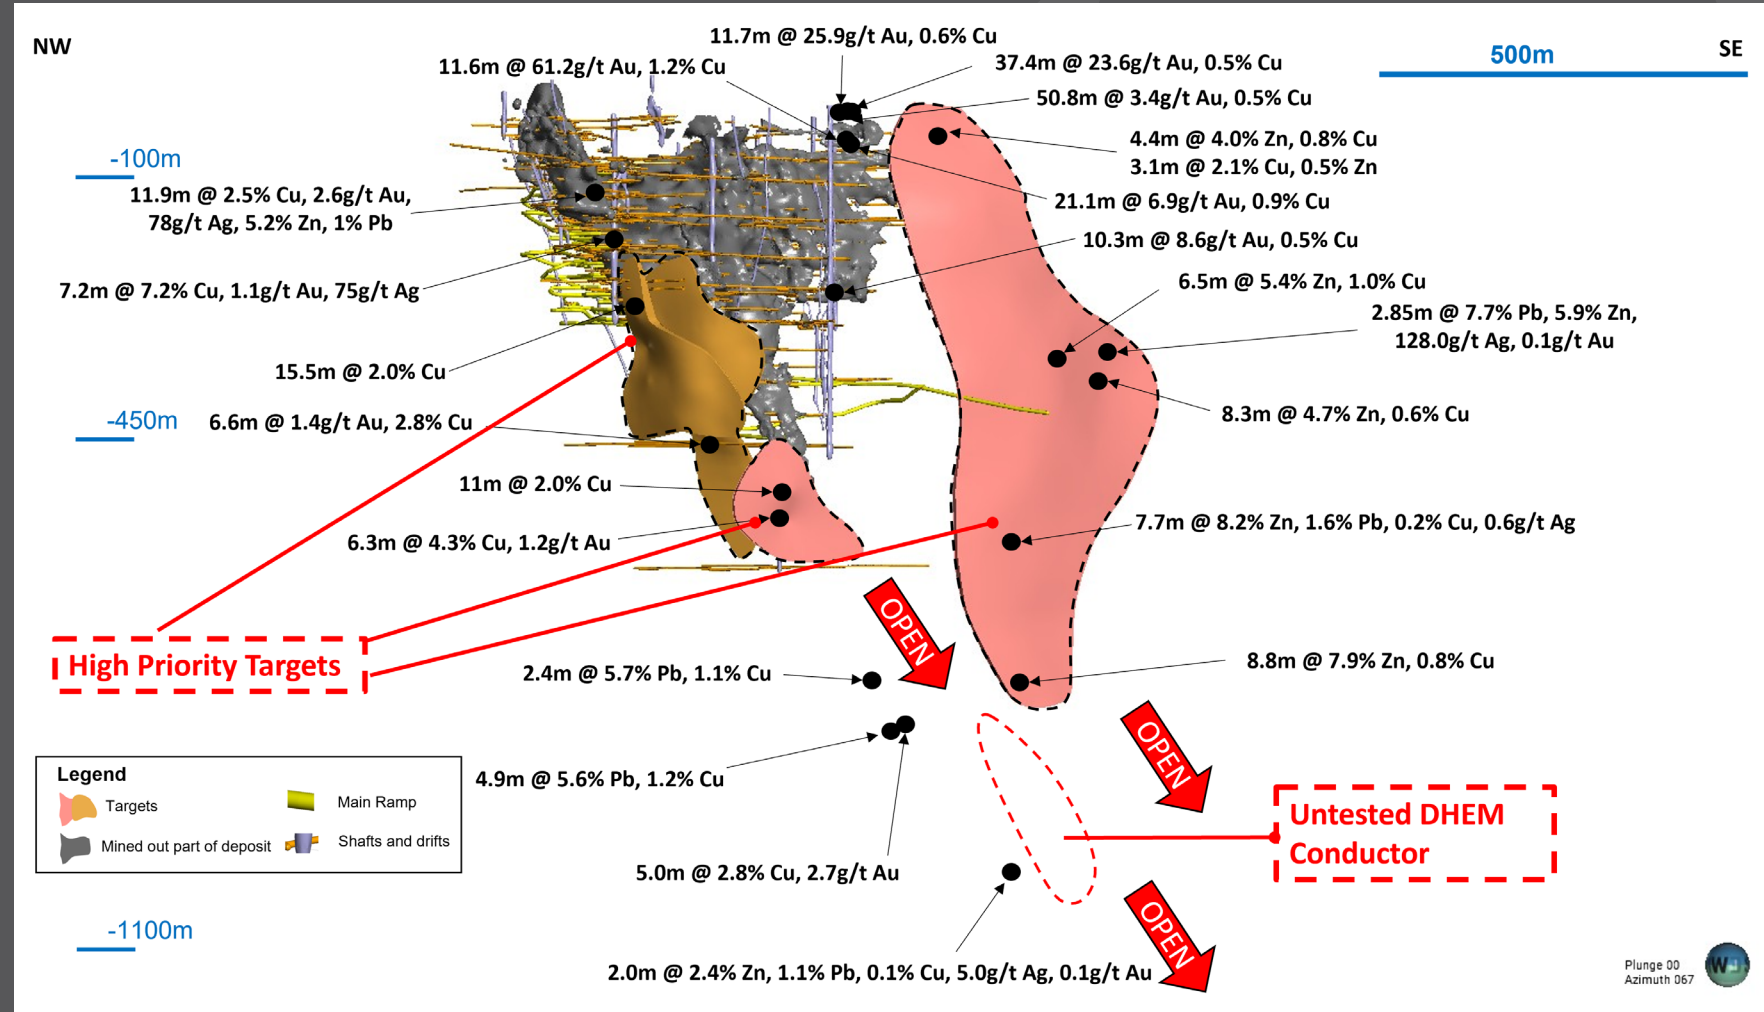

Unlocking the Potential of Falun

FALUN DEPOSIT REMAINS OPEN AT DEPTH¹

Potential opportunities at depth include an untested DHEM conductor

- No systematic deep drilling has ever been undertaken at Falun
- In addition to copper-gold, multiple zones of zinc-copper have been identified in historic drill core:
 - 8.8m @ 7.9% zinc, 0.8% copper
 - 7.7m @ 8.2% zinc, 0.2% copper
 - 11m @ 2.0% copper
 - 6.3m @ 4.3% copper, 1.2g/t gold
- In addition, Alicanto geologists have identified a downhole EM conductor which is yet to be tested
- All indications are for the mineralisation to continue at depth

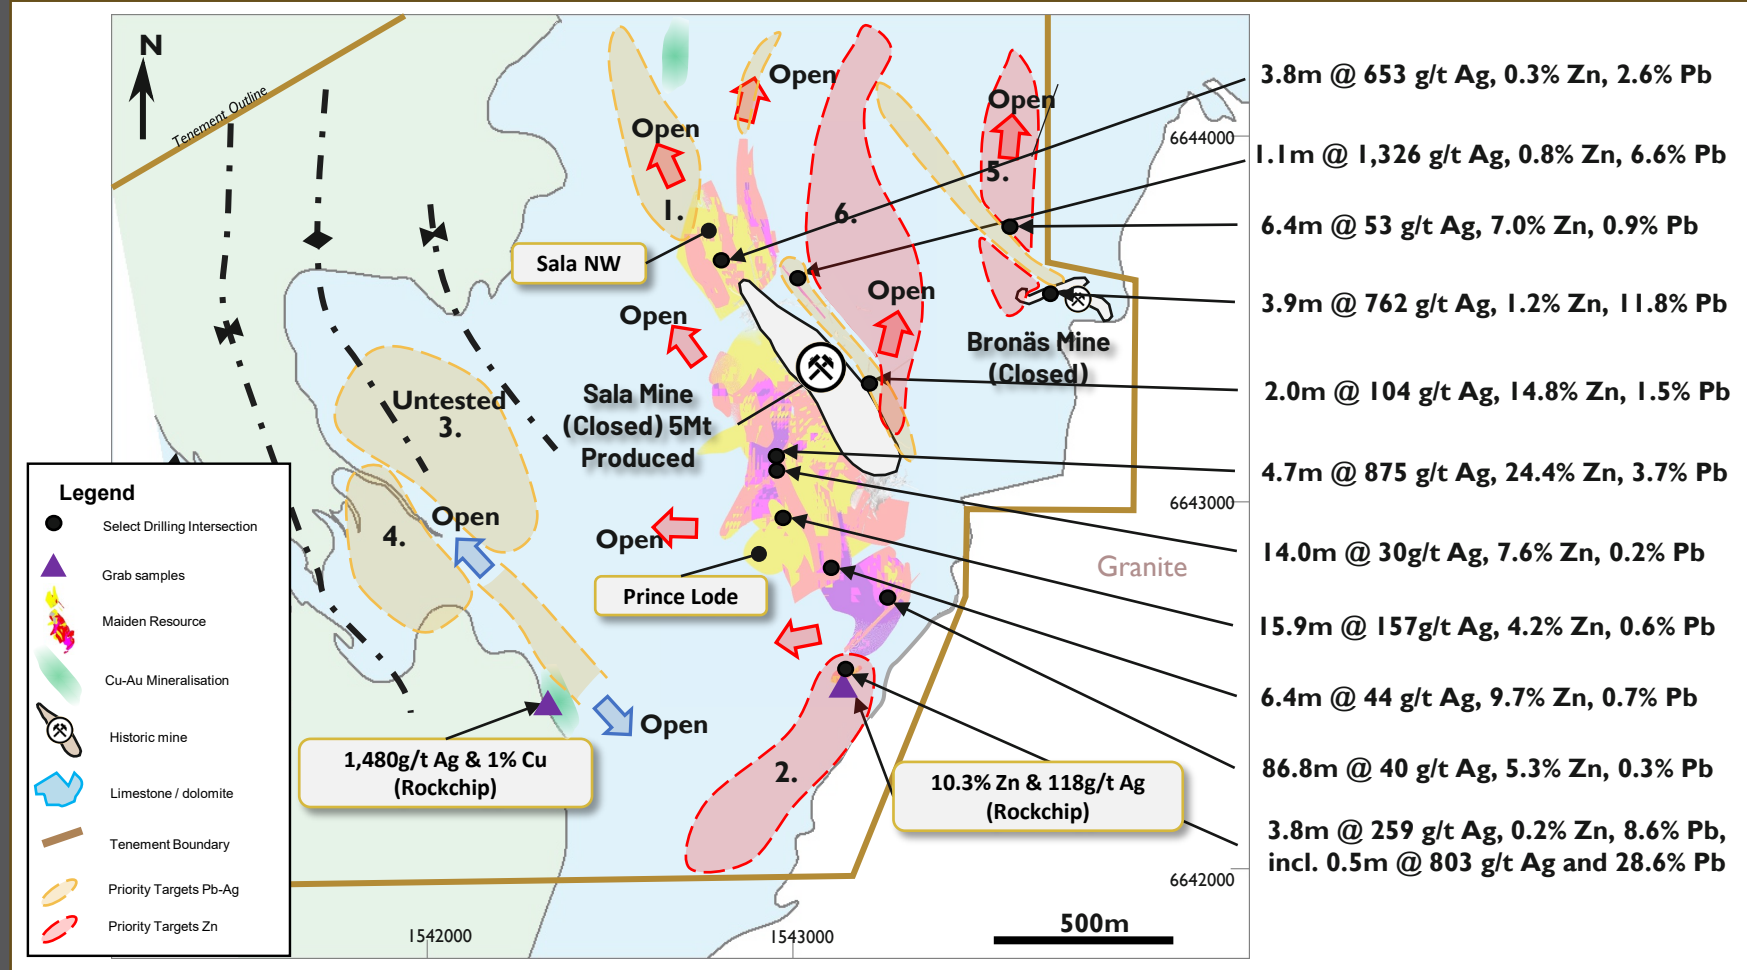

Sala Project

HIGHLY PROSPECTIVE FOR SILVER AND ZINC MINERALISATION

Recent drill program focused on new high grade silver discoveries (repeats of host horizon)

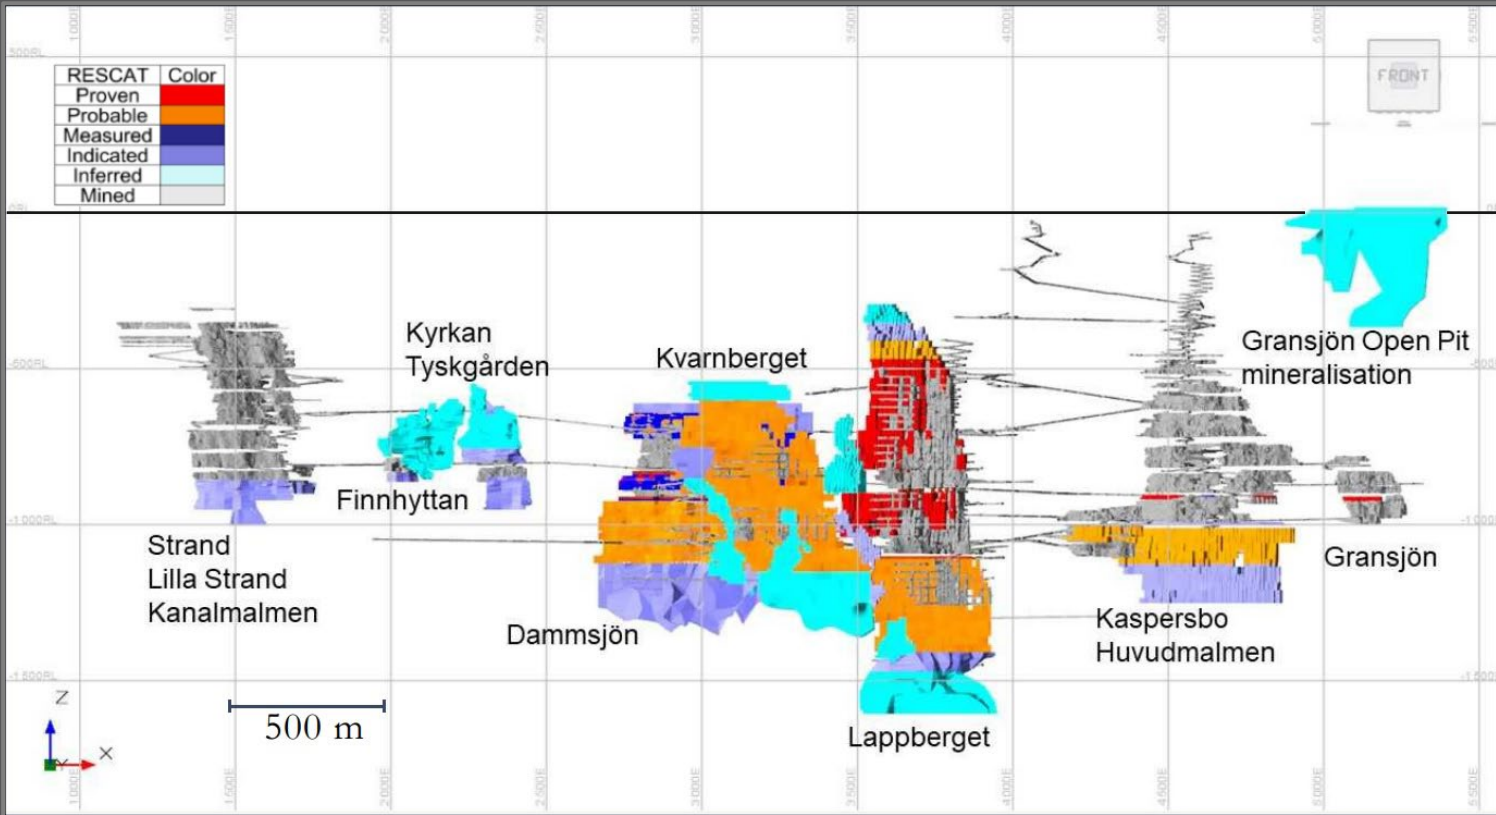

- Mined from 15th Century before closure in 1908
 - No modern exploration
- 20,000m of diamond drilling completed in ~12 months¹
 - System remains open along strike and at depth
- **Delivered maiden Resource of 9.7Mt @ 4.5% ZnEq²**
 - Containing ~311kt zinc, 14.7Moz silver, 44kt lead

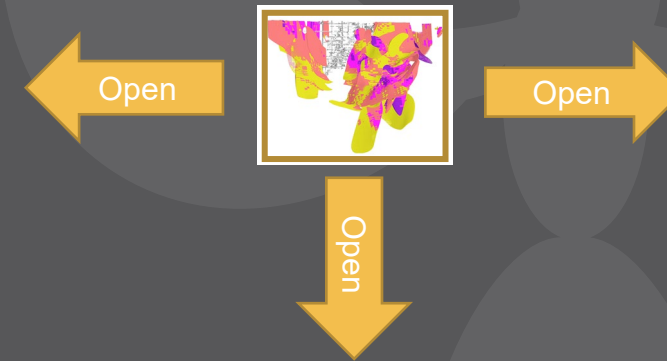

The Garpenberg Analogy

SALA RESIDES IN A SIMILAR GEOLOGICAL SETTING TO BOLIDEN'S MAJOR GARPENBERG MINE

GARPENBERG 173MT ORE RESOURCE¹

SALA 10MT INFERRED RESOURCE AND HISTORICAL PRODUCTION OF 200MOZ SILVER

- Same Scale
- Analogous Mineralisation and Lithology

Investment Summary

KEY TAKEAWAYS

Tier 1 Mining Jurisdiction

- Home to some of the world's major polymetallic deposits

Two Key Brownfields Projects

- Significant historical production and high prospectivity for future discoveries

Underexplored

- Highly successful drill campaigns continuing at both Sala and Falun
- Numerous high priority drill targets

Team with Track Record

- A team with a proven record of success (Bellevue, MDL, Centuarus) and significant in-country expertise

**ALICANTO IS TARGETING GAME CHANGING DISCOVERIES AT ITS
FALUN AND SALA COPPER-GOLD-SILVER-ZINC PROJECTS IN SWEDEN**

Appendix

SALA PROJECT - INFERRED MINERAL RESOURCE ESTIMATE

Independent JORC 2012 Inferred resource estimate at selected lower cut-off grades at the Sala Total Zn-Ag-Pb Project¹

Cut-off grade	Mass	Grade					Metal				
		Tonnes (Mt)	Zn Grade (%)	Ag Grade (g/t)	Pb Grade (%)	ZnEq (%)	AgEq (g/t)	Zn Metal (Kt)	Ag Metal (Moz)	Pb Metal (Kt)	ZnEq (kt)
>1.5% ZnEq	15.5	2.5	38.8	0.4	3.6	170	388.7	19.3	63.6	558	85
>2.5% ZnEq	9.7	3.2	47.3	0.5	4.5	214	311.3	14.7	44.2	437	66
>4.0% ZnEq	4.5	4.5	58.4	0.5	6.0	285	201.0	8.5	23.5	270	41

Figures have been rounded to 1 decimal place

ZnEq (%) are based on recoveries at analogous mineralisation systems in Sweden to calculate the Zn equivalent grades a recovery of 93.8% Zn, 82% Ag and 89.9% Pb was applied.

The following price assumptions were used to calculate the ZnEq (%):

- Zinc Price of USD \$2,976.24 per tonne
- Silver Price of USD \$22.62 per ounce
- Lead Price of USD \$2,259.07 per tonne

Equivalents were calculated using the following formula: $ZnEq = Zn\% + Zn\% \times [(727,345.29 \times 0.82 \times Ag\%) + (2,259.07 \times 0.899 \times Pb\%)] / (2,976.24 \times 0.9380 \times Zn\%)$

It is the Company's opinion that all the elements included in the metal equivalents calculation have a reasonable potential to be recovered and sold.
